Duratex uses HotCoating Technology from Kleiberit

Published on : Monday, April 14, 2014

Duratex is upgrading melamine faced MDF and particle boards to HighGloss surface boards with the innovative KLEIBERIT HotCoating Technology.

KLEIBERIT was developing this technology together with the spanish Machine Builder BARBERAN. Duratex SA, largest industrialized panel manufacturer in the Southern

Hemisphere and one of the Top Ten in the world, based in Brazil close to Sao Paulo, is running the production of High Gloss Panels with a huge HotCoating production line.

This 2.4m width line is designed to upgrade melamine faced MDF and particleboard with a high resistant, mirror-like decorative layer.

Duratex invested in these last years to achieve added-value products including the focus on environmental sustainability. HotCoating from KLEIBERIT was included in that package of investments.

The successfully start-up and launching of the Duratex HotCoating line was carried out in a record time, Duratex is now offering a wide range of decors in High-End quality under the brand name CRISTALLO to the local market as well as for export.
