KLEIBERIT 501

One component, polyurethane adhesive for very strong bonds with high temperature resistance and water resistance according to DIN/EN 204 stress group D4.

The handy bottle with the patented dispensing lid.

- self cleaning
- easy to dispense
- precise adhesive application
KLEIBERIT 501 is a single component PUR adhesive for strong bonds with high temperature resistance according to DIN/EN 14257 (WATT 91) and water resistance according to DIN/EN 204 stress group D4.

FIELDS OF APPLICATION
Bonding windows and doors, stairs, plywood to be used inside or outside (outside use with surface protection).
Bonding mineral building boards, ceramic materials, concrete materials and hard foams.

Please see warnings on the bottle before using!

PREPARATION
The surfaces to be bonded must be climatised, clean, dry and free from dust and grease. Release agents must be completely removed.

APPLICATION
• Single-sided application using a spatula or hand roller to the surface which is least porous
• Assemble the two pieces to be bonded
• The product cures to a water-resistant, solvent-resistant and semi-rigid adhesive film when subjected to the influence of humidity (air, materials). The cross-linking process can be accelerated by means of e.g. targeted moisture supply (fine water spray, approximately 20 g/m²), or by higher temperatures (40 °C up to max. 60 °C).
• The cross-linking process should take place with a pressure that guarantees sufficient contact of the glued surfaces. In order to protect exposed surfaces from being contaminated with glue, apply e.g. a silicone paper to this area.
• The necessary pressure is dependent upon the type and size of materials. A good closed joint should be achieved. Minimum pressure for bonding laminated wood: 0.6 N/mm². The more intensive the cross linking of the adhesive under pressure, the higher the subsequent load ability.

PROPERTIES OF THE ADHESIVE
• Base: polyurethane
• Specific gravity (20 °C): approx. 1.13 g/cm³
• Consistency: see table
• Temperature: <20 °C ideal, not below +5 °C
• Wood moisture: ideal for interior between 8-10%, for exterior between 10-14%
• Coat weight: 100-200 g/m²
• Open time:
• Press time:
• Curing time: see table
• Final strength: after approx. 24 hours with sufficient moisture
• Colour: brown

CLEANING
Clean application tools with KLEIBERIT 820.0 immediately after use.

ADHESIVE AND PACKAGING DISPOSAL
Disposal code 005501

PACKAGING
metal canister 501.6 5 kg net
metal canister 501.0 and 501.8 6 kg net
metal can 30 kg net
carton containing 12 plastic bottles 0.5 kg net each
Cleaner KLEIBERIT 820.0 metal canister 4.5 kg net
Additional packaging sizes available upon request.

STORAGE
KLEIBERIT PUR glues can be stored in original factory sealed containers at 20 °C for: KLEIBERIT 501.0 approx. 9 months, KLEIBERIT 501.6 for approx. 12 months and KLEIBERIT 501.8 for approx. 6 months. Keep in cool and dry place and protect from humidity. Opened containers should be used as soon as possible. KLEIBERIT PUR glues 501.0 and 501.8 are not frost sensitive at temperatures above -25 °C, KLEIBERIT 501.6 at temperatures above -20 °C.

EX 03/18 replaces previous versions

IDENTIFICATION
Identification required according to EU regulations, contains 4,4’-diphenylmethane-diisocyanate. See our safety data sheet 501.0, 501.6, 501.8. For professional use only.
