IMO Certification of KLEIBERIT Products

Another KLEIBERIT adhesive has successfully passed certification

As already reported in June 2010, KLEIBERIT Products 303.0, 501.0 and 706.0 have received the coveted Wheelmark Certification.

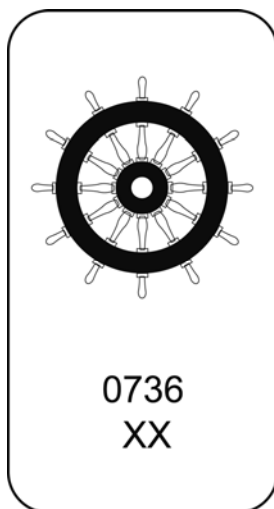

Now PUR Insulation Material Adhesive 509.0 has fulfilled all of requirements for the test and also has the Wheelmark symbol which shows that this

product complies with the strict rules of the International Maritime Organization (IMO).

According to the International Maritime Organization (IMO), the fire properties of building components and material used in ships must be tested for flame resistance and possibly smoke density and toxicity according to special fire tests.

KLEIBERIT will gladly confirm this to their customers with the EG-Type Examination Certificate which is issued by SeeBG.
