KLEIBERIT Expands its Product Range - Adhesive Applications in Ship and Boat Building

With the new product line SeaCraft, KLEIBERIT offers its customers a broad range of adhesives and sealants for the diverse applications in ship and boat building. With these innovative and certified products, we are able to provide perfect solutions to this new target group.

Of particular note is SeaCraft 664.0, a silane based adhesive and sealant which has excellent adhesion to virtually any surface and very good weathering resistance, as well as SeaCraft 663.0, the RINA certified solution for exterior glazing in shipbuilding. Adhesives such as KLEIBERIT 543.8 for the production of lightweight aluminum panels, as well as tried and tested adhesives such as KLEIBERIT 501.0 for highly resistant wood bonding or KLEIBERIT 303.0 for classic wood bonding complete the comprehensive product range.

Thus SeaCraft is another component in the KLEIBERIT product portfolio and successful proof of KLEIBERIT's customer orientation and development expertise. KLEIBERIT's team of specialists looks forward to answering all questions related to bonding and sealing.

The SeaCraft product line includes the following adhesive groups and applications:

- STP glues (silane terminated polymers)
 - *adhesive and sealing applications requiring high weathering resistance*
- 1C polyurethane adhesives and sealants
 - *Direct glazing exterior (RINA certified)*
 - *General bonding and sealing applications (UV protected)*
 - *Wood & sandwich Bonding*
- PVAC Adhesives
 - *Wood & Surface Bonding*
- PUR hotmelt adhesives
 - *Flat lamination*
 - *Assembly gluing*
- 2C PUR adhesives
 - *Lightweight and insulating panels*
