

## KLEIBERIT 535.0

### THE ORIGINAL IN THE DOUBLE CARTRIDGE

## MORE THAN 16,000,000 DOORS INSTALLED

The propellant-free assembly foam for high-quality and safe frame assembly. KLEIBERIT 535.0 hardens very quickly, can be cut after just 3-5 minutes and braces can be removed after approx. 20 minutes. During the curing phase, there is no compression, the frame remains in shape and in place. Thanks to the double cartridge, the optimum mixing ratio of the two components is always achieved, resulting in a uniform and fine cell structure of the foam.

#### PROPERTIES

- Very low emission
- EMICODE® seal EC1 PLUS
- Emission class A+ according to French VOC regulation
- Building material class B2 (DIN 4102, Part 1)

#### ADVANTAGES

- Free from aerosol
- No post pressure
- Can be subjected to loading after just a few minutes
- Cures independently of moisture
