

KLEIBERIT 605.0 PROFESSIONALS BOND WITH STP GLUE

SIMPLE BONDING THANKS TO INNOVATIVE 1C STP TECHNOLOGY

Adhesives based on silane-terminated polymers (STP) produce highly resilient bonds and are becoming increasingly popular. The wide range of possible applications and excellent processing properties make KLEIBERIT 605.0 very attractive for everyday use in joineries and on construction sites. The adhesive is easy to apply with a spatula, brush or roller and does not foam.

ADVANTAGES

- One-component
- Reactive
- Solvent-free
- Isocyanate-free
- Water-free
- Free-flowing
- Versatile processing and application options
- No foaming of the joint
- Available in the colors beige (605.0.20) and grey (605.0.90)

APPLICATIONS

- Bench glue for bonding beech, oak and spruce wood elements for use in dry interiors
- Surface bonding of various materials such as polyester GRP, epoxy GRP, hot-dip galvanized steel, stainless steel, aluminium, glass and concrete to wood-based materials
