

KLEIBERIT 605.1.20 STP ADHESIVE

THE ONE COMPONENT ADHESIVE BASED ON STP WITH EXCEPTIONAL PROPERTIES

Adhesives based on silane-terminated polymers (STP adhesives) create highly resilient bonds. These adhesive systems are characterized by a wide range of applications and excellent processing properties.

ADVANTAGES

- One component - reactive - low viscosity
- D4 according to DIN EN 204 and DIN EN 14257 (Watt 91)
- Wide range of applications thanks to excellent adhesion properties on many materials
- Application by brush, notched trowel, roller or bead application
- Solvent-, isocyanate- and water-free
- Very low emissions (EC 1 PLUS) according to GEV EMI CODE® classification
