

PUR Cleaner 823.0

Field of Application

Universal cleaner

- removal of fresh PUR foam
- cleansing of PUR applicator gun

Advantages

- CFC free
- reliably removes fresh PUR foam

Properties of the Cleaner

Identification: identification required according to EU regulations.
(See our safety data sheet).

Application

Precise removal of fresh PUR foam splashes.

Fresh foam splashes can be easily removed. Place the spray head onto the valve and apply light pressure. Directly spray onto the soiled area. On sensitive surfaces, test before starting on a concealed part. When finished, wash off the released remains of the PUR foam, or in the case of cleaned textiles, rub off the remains.

Cleaning the PUR applicator gun

First, using the mounted spray head, clean off all external traces of fresh PUR foam. Remove the spray head and replace with the adapter for the can of KLEIBERIT PUR-Cleaner. Carefully screw the adapter as far as possible on to the connector of the applicator gun. Ensure that the container is mounted squarely and not screwed on too tight.

Carefully press the release trigger to remove any remnants of PUR foam from inside the gun body. Keep the trigger pressed until cleaning liquid emerges from the nozzle. Release the trigger and allow the cleaner to work for 1-2 minutes. Press the trigger again until only clear cleaning liquid appears. If necessary repeat this procedure 2-3 times. Spray onto an unwanted carton or similar to avoid soiling any valuable surface. Following cleaning, unscrew the KLEIBERIT PUR Cleaner container and remove.

Note

Foam which has already hardened can only be removed mechanically. Do not use sharp object to clean the applicator gun. Never use water to clean or whilst disassembling the applicator gun.

Attention

KLEIBERIT PUR Cleaner 823.0 can stain or loosen certain underground surfaces, (e.g. paint, lacquer, plastics, textiles). Therefore, always carry out a test on a concealed part.

Packaging

Packed in cartons containing 12 x 500 ml tin cans.

Storage

PUR-Cleaner 823.0 can be stored for approx. 24 months

Version XI 1215; replaces previous version

PUR Cleaner 823.0

Cleaner and Waste Disposal

Fully drained can be recycled as metal recycling.
Don't allow residue cleaner to dry up.

Waste Code no. 160505
